PROFILE

Software Developer with a background in Computer Science and Artificial Intelligence. Adept at leveraging Python, SQL, and structured problem-solving across the full Software Development Life Cycle (SDLC). Proven track record of building scalable full-stack applications, integrating multimodal AI and Machine Learning (ML) frameworks, and translating complex requirements into high-performance, data-driven software solutions.

EDUCATION

B.Tech in Computer Science (Artificial Intelligence) <i>Galgotias College of Engineering and Technology</i>	2022 – 2026 Greater Noida
Secondary & Higher Secondary Education <i>St. Francis</i>	Anpara

SKILLS

Languages HTML5, CSS3, JavaScript (ES6), Python, SQL,	Backend Developement Flask, FastAPI, Spring Boot, REST API Development, JSON, CRUD Operations
AI/ML Frameworks PyTorch, Scikit-Learn, OpenCV, TorchVision, NLP, NLTK, NumPy, Pandas	Databases MySQL, Relational Database Management Systems (RDBMS), Advanced SQL
Tools & Platforms Git, GitHub, VS Code, Jupyter Notebook	Core Computer Science Data Structures & Algorithms (DSA), DBMS, Operating Systems, Computer Networks, System Design

PROJECTS

- AI Powered Multimodal Rumour and Misinformation Detection system**
- **Pipeline Engineering:** Developed an end-to-end multimodal classification pipeline using **Python**, **Natural Language Processing (NLP)**, and supervised **Machine Learning (ML)** models to analyze text and visual metadata from the **Fakeddit dataset**.
 - **Feature Engineering & Preprocessing:** Leveraged **Scikit-Learn** and **NLTK** to implement text preprocessing (tokenization, lemmatization, stop-word removal) and engineered **TF-IDF** features across unigrams and bigrams to handle unstructured, noisy social media data.
 - **Performance & Business Impact:** Achieved a **classification accuracy of 86.71%**, successfully automating the moderation of rumor vs. non-rumor content and significantly reducing manual verification overhead to protect platform integrity.

INTERESTS

Full-Stack & Data Exploration: — Enthusiastic about full-stack web development and data exploration; experienced in translating concepts into functional applications, building automated web scraping scripts, and engineering data pipelines to clean and analyze datasets. | **Interactive Side Projects:** — Building lightweight mini-games and interactive applications using JavaScript to experiment with user interface (UI) layout, state management, and responsive frontend design.
